

JOB/PERSONALITY

Career Aptitude Test: Report

You are investigative and artistic

The professions that best suit your personality are those that require you to be investigative and artistic. The profession of [AUTHOR](#) is an excellent example of this. Also consider professions such as [architect](#), [technical writer](#), [animator](#) and [desktop publisher](#). Unfortunately, there are no known investigative/artistic professions that are compatible with lower qualification levels. At the same time, there aren't many professions that score both high in terms of the investigative and artistic categories that are suitable for higher educated employees, either. When scoring high in these two categories, it's therefore recommended that you take a look at alternative professions as well. For example, take a look at those professions that score high when it comes to your top two personality traits combined with your third personality trait. You can easily do this using the [career choice profiles](#).

Score per personality trait

Realistic: 5

Conventional: 6

Enterprising: 1

Social: 4

Artistic: 7

Investigative: 7

Find other occupations
